Comments: UAA survey occurred in April 2005 and no uses were observed. The stream met the maximum depth at one out of five sites and average depth criterion at one out of five sites (same site). Interviews of two individuals at different sites indicated that the stream was not used for recreational purposes. Because of the overall shallow depth of the stream and interviews that indicated the stream was not used for WBCR, the committee recommends removing the WBCR designation.

Committee Recommendation: ☐ Retain Use ☐ Modify Use ☒ Remove Use
